# About us

Moduleo® is a division of the IVC Group, world-class manufacturers of vinyl floor coverings. Specialising in the production of high-quality, modular synthetic floorings for residential and professional applications, Moduleo® Design Floors aim to inspire and satisfy the requirements of even the most demanding customer.

Backed by a global company, but with local expertise, customers can realise their design dreams with confidence, thanks to unwavering standards and extensive guarantees.

Moduleo® is a division of the IVC Group, world-class manufacturers of vinyl floor coverings.

## What is Moduleo®

## Technical

The Moduleo® range comprises of both planks and tiles that can be fixed either floating or glued down. Because of their unique structure, the Moduleo® planks and tiles stand out due to their rigidity, their maintenance friendliness and their natural appearance.

Moduleo® is composed in a multi-level format to provide the ultimate in performance and aesthetic quality.

- 1) Protectonite® PU: Extra Polyurethane (PUR) treatment protects the floor against scratches and dirt.
- 2) Wear layer: Transparent wear layer protects the design foil.  
The surface embossing provides an authentic and natural appearance.
- 3) Design foil: Tile designs are applied to the design foil by means of an innovative printing technique.
- 4) Backing: Sound-proof base that provides optimal adhesion to the floor thanks to the refined texture of its underside.

Moduleo® Design Floors are high-quality design floor solutions intended for both the residential and commercial market.

# What is Moduleo®

Easy as 1-2-3

**1** Unpack

**2** Angle & click

**3** Push down

## Click

Click flooring is specially designed for even quicker and easier installation of Moduleo® vinyl flooring planks. Manufactured with a proven Unilock system and patented push down technology, each piece simply locks directly into place, giving to same stunning aesthetic qualities as a traditional installation, but faster and **without the need for adhesive**.

- Thanks to the **patented L2C click technology**, the Moduleo® Design Floors are **simple to install** and they comply with all expectations for a modern interior.
- With a Moduleo® Design Floors, you give your interior a **total new look, without the need for major construction works**.
- The Moduleo® planks and tiles are simple to cut with a sharp knife. All in all, **a dust free solution** for a brand-new floor covering.
- All the floors in this brochure are **available in click-version** (floating installation) and in **dry back version** (glued installation).

## Installation

To ensure your Moduleo® Design Floors live up to the highest expectations, it is recommended that a professional installs it. Using a professional ensures a quality finish and validates our guarantee.

## Why Moduleo®

Moduleo® Design Floors bring all the elegance and detail of natural materials, with none of the drawbacks. With a variety of layout possibilities, Moduleo® offers the chance to create truly unique spaces.

The fact that Moduleo® is water resistant, scratch resistant, is easy to maintain and has excellent sound insulating properties means that it is the ideal choice for any area of the home or beyond.

We aim for our products to be as ecologically sound as possible at every stage: from the beginning to the end of their lives – and beyond. Our floor tiles consist of up to 50% recycled materials and they themselves can be reclaimed and recycled at the end of their product life. They are all made at our 'green' factory in Avelgem, Belgium, which meets the strictest EU air and water pollution standards and will shortly be run entirely on wind energy.

Our investment in sustainability ensures that Moduleo® Design Floors only make an impact on design spaces, not the planet.

Moduleo® Design Floors bring all the elegance and detail of natural materials, with none of the drawbacks.

## Moduleo® design highlights

**Unique! Extra long** Moduleo® goes to great lengths to ensure every floor will be unique and will retain that natural look. The number of repetitions in the design must therefore be kept to a minimum. Thanks to the extra-long sizes we use during the printing of designs, these repetitions occur a lot less frequently. Thus you can generate a lot more variation with the planks and tiles. The result is a unique floor with as much variation as the natural material itself.

**Clear print** At Moduleo® we apply a unique printing technique, using a very fine dot screen. This allows us to print our designs razor-sharp, so it's almost impossible to tell the difference from the real thing.

**Natural look & feel** By using a structure press, the top layer of the tiles feature a relief that accurately recreates the subtle textures of natural materials, allowing you to feel wood grains and stone grooves.

**Bevel** The bevel accentuates the Moduleo® planks and tiles, contributing to the natural appearance of your floor.

**No shrinkage & no expansion** Thanks to their patented construction with a double fibre glass membrane, all Moduleo® Design Floors have extremely high dimensional stability.

### Guaranteed quality:

- ☑ 15 year guarantee on Select collection
- ☑ 20 year guarantee on Transform collection

# Why Moduleo®

## Ecological

Our purpose-built 'green' factory in Belgium not only manufactures our luxury flooring in an eco-friendly way, but also means that unlike many flooring companies, we do not import our product from the Far East.

Each Moduleo® floor contains up to 50% recycled materials and can be recycled at the end of their product life. During their lifespan, our floors are user-friendly, as well as eco-friendly. Maintenance doesn't require harsh chemicals, while their heat insulating properties mean that you can lower your thermostat and thus, your energy consumption.

We are continuously endeavouring to improve each aspect of our business, with rigorous selection and inspection of raw materials, green energy, minimal water consumption, saving on transport. Ensuring that Moduleo® is an ecologically responsible and intelligent choice for the future.

## Produced with green energy

Our production site in Avelgem is being equipped with three own wind turbines that adhere to the strictest standards of noise pollution and shadow casting. With a maximum production of 6.9 MW, the turbines will provide the complete energy needs of the Moduleo® production unit.

## Raw materials from a controlled origin

At Moduleo®, we make sure that our production processes fall within all international standards. This extends to the selection of raw materials for our floors, all of which adhere to the REACH regulations

## 35 to 50% recycled material

The Moduleo® design floors consist of 35 to 50% of recycled material of a controlled origin. This way, we obtain particularly 'pure' PVC, via post-industrial recycling.

## Water-based ink and lacquer

We exclusively use environmentally friendly inking methods and a water-based polyurethane lacquer to for the protective layer of our floors.

## A minimum of packing material

We are constantly striving to improve our packaging methods and to find innovative ways of reducing waste.

Moduleo® is an ecologically responsible and intelligent choice for the future.

## Made in Belgium

All Moduleo® Design Floors are made in Belgium, close to our customers and avoiding long, energy-consuming transport. A conscious environmental choice to reduce CO2 emissions and to limit our ecological footprint to a minimum.

### Inspirational vinyl flooring

Moduleo® provides endless creative possibilities to design your own floor, with varying sizes, patterns and textures available to make your space a masterpiece.

### Natural selection

Each plank has its own personality. This avoids pattern repeats, giving a natural feeling to your flooring and giving you the satisfaction of a truly unique look.

### Protectonite®

The upper Protectonite® layer is scuff and stain resistant and is easy to clean, offering maximum protection with minimum maintenance.

### Sound insulating

Unlike traditional wood or laminates, Moduleo® vinyl flooring absorbs sound, giving better acoustics in the home or working environment.

### Designed to last

Moduleo® vinyl flooring comes with the peace of mind of an extensive product guarantee.

### Sensational

Excellent heat insulation means that Moduleo® luxury vinyl flooring feels warm to the touch. They also have excellent impact resistance, making them perfect for busy homes and businesses.

### No waste

Any installation will result in a minimum of waste, so you only buy what you really need.

### Moisture-resistant

An easy clean moisture-resistant wear layer makes Moduleo® flooring suitable for any room, even bathrooms and kitchens.

### Hygienic

No expensive cleaning agents are required to keep your floor at its best; just a simple broom, mop and vacuum cleaner. A Moduleo® floor will not harbor dust mites and other allergens.

wood

## Classic Oak 24228

A classic oak floor for people who enjoy the sense of inviting familiarity that comes with traditional oak timber. Faithfully recreated patterns and textures of oak bring a homely, yet sophisticated aura to a classic or contemporary style.

## Classic Oak 24125

Due to their unique structure, Moduleo® Design Floors help keep noise to a minimum, whilst providing limitless interior design options.

## Classic Oak <sup>24960</sup>

The extra-long print design ensures the same patterns are repeated less often. Thus resulting in a floor with a natural look which resembles the natural materials.

# Classic Oak

## Country Oak <sup>24958</sup>

Introduce the rustic force of nature into your interior. The knots add a visually arresting component to this versatile hardwood, for people who appreciate a distinctive floor.

## Country Oak <sup>24842</sup>

Due to the design's sharp print, Moduleo® Design Floors radiate the natural strength of a real oak floor.

# Country Oak

## Tectona Teak 24930

The perfectly balanced look of an imperfect hardwood board is evident in stunning examples of the seductive power of imperfection. With the unique features of rough sawn timber, it brings elegance to interiors of character.

# Tectona Teak

24235

24870

24930

## Verdon Oak <sup>24866</sup>

Experience the timeless elegance of first grade hardwood. A design without knots exudes style, tranquillity and class thanks to the warmth and intimacy of natural hues. A traditional choice that's never old-fashioned.

## Verdon Oak <sup>24242</sup>

Choose a floor that can withstand heavy use. A floor that can absorb major as well as minor impacts. And make a 'green' choice for future generations.

# Verdon Oak

Select  
stones

## Cantera Stone 46990

The stunning detail and charm of natural stone are beautifully captured in this series. The scratches and stains contribute to the floor's natural features. It's a choice teeming with life and vitality.

## Cantera Stone 46930

Bar stools pulled over the floor. A falling glass. A modern floor solution must be able to take heavy wear and tear. Thanks to the wear layer and the Protectonite® protective layer, the Moduleo® Design Floors are not only tough but also easy to maintain.

## Cantera Stone 46227

Nature is beautiful. Nature is powerful. With Moduleo® Design Floors, you can have all the benefits of nature with non of the maintenance drawbacks.

# Cantera

## Jazz 40237

A contemporary concrete look with a colour range that runs from warm brown to austere black, Jazz is a sleek, bold and stylish choice for modern minimalist tastes or a more traditional setting.

Jazz 40880 Joint strip 347

This stylish warm-brown floor feels completely at home in your bathroom.

## Ethnic Wengé 28890

The exotic charm and exclusive look of tropical hardwood is within reach. Irresistible warmth and swirling details elicit dreams of distant adventures and a return to nature.

## Ethnic Wengé 28282

The warmth of the Ethnic Wengé in the living room overlooking a green environment ensures the ultimate in relaxation. The planks' top-layer texture accentuates the natural look & feel.

## Ethnic Wengé 28815

This floor guarantees a warm atmosphere and is also the perfect background for entertaining.

# Ethnic Wengé

# Montreal Oak 24825

Customers will feel completely at home thanks to the warmth of the floor covering.

## Montreal Oak <sup>24570</sup>

Tear patterns and hypnotising lines of the growth rings produce an energetic, warm feeling and helps to recreate the rugged character of the great outdoors.

## Montreal Oak

24876

24825

24570

## Ontario Elm 28936

The Ontario Elm planks stand out because of their very large lines. They create a unique combination of perspective and depth in any environment. The result is a classy and unique interior.

## Ontario Elm 28270

Children feel completely at home thanks to this Moduleo floor, warm to the touch, soft underfoot.

# Ontario Elm

## Latin Pine 24110

Pinewood is a symbol of colour and vibrancy for those looking for a striking domestic or commercial environment. Knots, lines and woody imperfections add to an authentic feel that's sure to appeal to nature-lovers.

## Latin Pine 24874

Feel the strength radiated by this floor and imagine yourself in the middle of the forest. The floor is water-resistant and easy to maintain. Ideal for a bathroom with lots of character.

## Latin Pine 24868

Create a modern clean workplace with this distinctive floor that can take knocks and face the hustle and bustle of a modern office area.

# Latin Pine

## Verdon Oak <sup>24870</sup>

The timeless elegance of first-class wood is epitomised in smooth designs that exude a natural style. Simple, yet classy; Classic, but not old-fashioned; Smart without being pretentious – that's Verdon Oak.

## Verdon Oak 24226

Renovation doesn't need to go hand in hand with demolition and dust.  
Choose a soft renovation with a Moduleo® Design Floor.

## Verdon Oak 24962

Verdon Oak shows its true colours perfectly in real life. Pets, playing children,... nothing gets this floor down.

## Verdon Oak 24232

Create a stylish, and easy to maintain hotel lobby,  
with a Moduleo® Design Floors.

# Verdon Oak

## Baltic Maple 28884

The lively lines of maple wood make their mark in either warm or greyish shades of the Baltic Maple range. Growth rings and intricate details add character to homes, offices and commercial spaces.

## Baltic Maple 28976 + 28932

Thanks to the large sizes, repetition of the same patterns is limited. By combining colours within the same collection you are never limited in design possibilities.

## Baltic Maple 28230

Experience a breath of fresh air outdoors, or take a breather in your cosy living room. A Moduleo® floor meets the highest standards for indoor air quality.

# Baltic Maple

## Classic Oak 24815

This is a classic among oak floors, for the lover of solid traditions. The knots and nuts produce a natural glow and give an elegant, stylish feeling.

Actual patterns and shades may vary from those depicted. The random nature of the wood and other natural materials from which our designs are taken means that significant colour and design variation is normal, and indeed enhances the natural look of Moduleo design floors.
